# LTW RJ45 In-line Connectivity

LTW®

Innovator & Manufacturer of Environment-Proof World

## LTW® RJ45 NETWORK SOLUTIONS

IP 68
In-Line Connectivity
Panel Connectivity
Feedthru Installable
Stand alone waterproof
Full Shielded

**Offers flexibility and function for your Ethernet and Wireless connection needs.**

Flexibility comes from its unique design, a dual-purpose that is suitable for panel and/or in-line connection. The RJ45-NS is also made for Ethernet systems for high speed 10BaseT, 100BaseT and 1000BaseT networks. The receptacle of this shielded RJ45 is enclosed by UV protected housing and terminated by a cable gland. It can adapt to existing network cables such as UTP, STP or FTP RJ45 Cable. The gasket material was improved to meet the waterproof capability, more resistive to water entry. RJ45-NS is a field installable feed-thru, a kind of system that can be used for outdoor applications which will provide flexibility that can use pre-terminated cables. This contemporary wireless connector will allow a quick and easy connect and disconnect system.

With an IP68 rating, it can withstand in dusty environment and immersion in water, and made of material that can resist moisture and corrosive elements. The contour is ergonomically design for easy installation; it is also suited for set-up box, panel and in-line connections.

WATERPROOF RJ45-NS WATERPROOF RJ45-NS WATERPROOF RJ45-NS WATERPROOF RJ45-NS

IP 68

Panel Connector with waterproof cap

- RJ45 Receptacle (end to end)
- 100 BaseT and 1000 BaseT
- Full Shielded

- Feedthru Cable Gland

- Panel Connector Assembly

- Panel Connector with Waterproof cap and feedthru cable gland at rear

- Waterproof cap with plastic chain

- In-Line Connection

- IP 68 Waterproof Cap

- Panel Mounting
