Ladies and Gentlemen,

Jauch announces a new ultra-miniature Quartz Oscillator JO21:

The JO21 is an ultra small-sized miniature Oscillator with a frequency stability as tight as $\pm 50\text{ppm}$, and is offered in a frequency range from 0.85 MHz to 50.0 MHz .

The JO21 is also available for the extended temperature range (-40°C ~ +85°C).

The JO21 is particularly suitable for miniaturized electronic devices with very limited space on printed circuit board.

Key-Features of the JO21:

- ultra compact miniature package: 2.0 x 1.6 x 0.6 mm
- high frequency stability: $\pm 100\text{ppm} \sim \pm 50\text{ppm}$
- frequency range: 0.85 MHz ~ 50.0 MHz
- supply voltages: 1.8V / 2.5V / 3.3V
- operating temperature range: -20°C ~ +70°C / -40°C ~ +85°C
- very competitive price
- typical applications: office automation, audio and video processing, PC peripherals, LCD monitors, TV sets, satellite receivers, digital still camera
