WATERPROOF M12-VENT CONNECTOR

ARE YOUR PRODUCTS SAFE FROM, PRESSURIZATION, CONDENSATION AND HUMIDITY?
LTW HAS THE SOLUTION...

LTW offers a new series of connector that helps in maintaining the air density inside the enclosure by releasing the excess vapor when the pressure exceeds the normal state thus preventing condensation. Vapor to liquid state occurs when the pressure inside the enclosure increased – known as compression.

With the aid of LTW Vent Connector, the air inside the enclosure will be constantly regulated while maintaining the ingress protection from outside particles like water.

Check for more information about this innovator connector can helps you solve the problems of pressure, condensation and humidity hence helping you save costly maintenance and replacement.
