

NEW: D-SUB In-line and Push-Pull

Today's latest product from **LTW Technology**

new D-Sub In-line and Push-Pull (Automated Latch)

LTW D-sub Series are now available for In-line (Cable-to Cable) version and available for Size 1, Size 2 and 3.

To enable the in-line feature to work on existing LTW's D-sub molded cable and/or Field installable, all you have to do is to purchase the corresponding D-sub size of In-line Adaptor as show here and remove the existing Gasket. It meets IP67 requirement.

Do you also know that Push-Pull (automated Latch) D-sub Metal Version is available ??

It is robust, solid and vibration-proof. It can meet IP69K requirement and suitable for application with high vibration, temperature and harsh conditions.
