

LTW[®] INNOVATOR & MANUFACTURER OF WATERPROOF AND ENVIRONMENT-PROOF WORLD

LTW's Marine Waterproof Connectors Certificated by NMEA 2000

LTW, the manufacturer concentrating on outdoor waterproof connectors in Asia, launched its new marine connectors certified by NMEA 2000. NMEA (National Marine Electronic Association) was formed by global marine electronics manufacturers, experts and scholars to set up the communication standard including data transmission and communication format to reduce extra hidden cost. NMEA 2000 Network Standard emphasizes on the convenience among electronic components by recognized standard to plug and play easily. The marine manufactures simply select connectors with NMEA 2000 Network Standard and it could minimize the misunderstanding and confusion among all communication equipments; as well as providing safe and reliable communication condition for stable operation system. Hence, the incompatible condition from different components manufactured by different manufacture will be avoided.

LTW's connectors are based on state of the art NMEA 2000 Network Standard to develop and design products tested by corrosion, vibration, water resistance and many others. LTW's products under these tests result in more choices for customers. We made it possible to simplify your system needs and promote convenience with cost effective offer and wide array of waterproof connector choices. All of these products are made with quality, enhanced performance and highly reliable.

Indeed, NMEA 2000 Standard is based on CAN (Controller Area Network) and International Electromechanical Commission is going to adopt NMES 2000 as SOLAS class vessels 61162-3 standard.
