IMAGE SENSOR SOCKETS

***With Andon's Unique Senstac™ Contact
Maximum Protection and Reliability at Lowest Cost.***

www.andonelect.com or www.andonelectronics.com

Andon has become recognized as the Interconnection Specialist, offering a single, reliable source for IC sockets, micro-precision sockets, adapters, board-to-board interconnects and contact/terminal products. Over the years Andon has set the industry standard for innovation, reliability and superior quality.

Andon's ISO 9001 certified facility offers leading edge tooling, stamping, high-temperature molding, screw machine products and automated assembly capabilities. The result is a line of products, like our Rollerball® Socket technology, that brings true problem solving product process innovation and cost savings to the industry.

Whether you need large or small volume production, stock solutions or custom sockets and interconnects, Andon has the inherently smart, simple and cost-effective solutions to make you more productive.

John O. Tate, Andon President, pioneered many of the innovative, high-reliability interconnects for military, aerospace

and commercial applications that have become industry standards. In 1965, he developed the stamped and formed multi-finger precision IC socket contact, which remains the preferred method throughout the world for connecting today's microprocessors and other critical components.

Image Sensor Sockets For High-Performance CCD-CMOS Sensors

Andon has developed the largest line of Image Sensor Sockets in the industry. We have sockets for Atmel, Dalsa, E2V, Fairchild, Hamamatsu, Kodak/Truesense, Marconi, Micron, Motorola, National, NEC, Peripheral Imaging, Phillips, Site, Sony, Ti, Toshiba, etc...

Image Sensor sockets provide higher reliability because the sockets can be soldered to the motherboard in large quantities.

Lates, as required, the sensors can be plugged-in or unplugged and upgraded easily.

The advantages for using sockets:

- Reduce static discharge (ESD) because of less handling.
- Eliminate soldering temperature which can effect the color array.
- Eliminate need to de-solder CCD-CMOS
- Eliminate cleaning solution, scratches to glass plate and risk blistering PCB
- Eliminate assembly line temperatures, humidity, and shock

Frame Grabber Sockets

- Andon is the industry leader for Rollerball® Ball Grid Array Sockets.
- Contacts are specifically designed for Ball Grid Array Sockets.
- Andon can supply BGA sockets to any footprint.
Contact Andon for price and delivery
- Engineering assistance available.

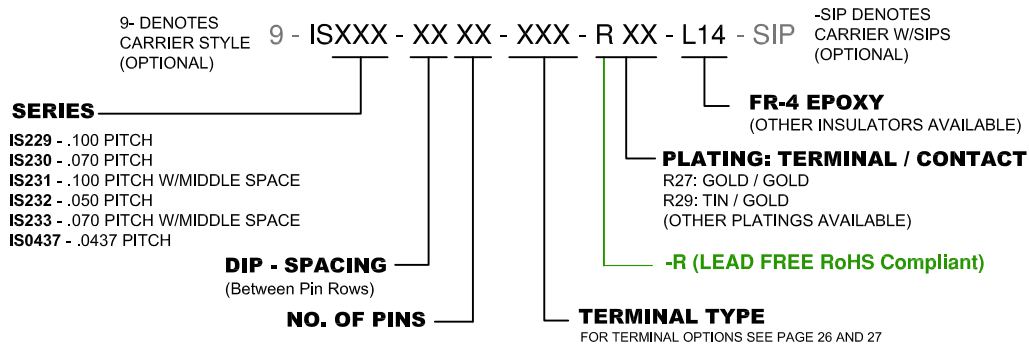

We produce, in-house, the contact we developed 38 years ago for the aerospace industry, which ensures a reliable source for your needs. Contacts are available in low, Medium, and High Force to suit your requirements.

Andon sockets provide perpendicularity, accurate spacing and interchangeability, while improving quality and reducing cost. Samples are available on request.

Image Sensor Socket Applications

[Back to Table of Contents](#)

Image Sensor sockets provide higher reliability because the sockets can be soldered to the motherboard in large quantities. Later, as required, the sensors can be plugged-in or unplugged and upgraded easily.

The advantages for using Image Sensor Sockets:

- Eliminate production line Electro-Static Discharge (ESD) because device is plugged in after all assembly.
- Eliminate soldering temperature which can effect the color array.
- Eliminate the need to de-solder CCD.
- Eliminate cleaning solution, scratches to glass plate and risk blistering PCB.
- Eliminate assembly line temperatures, humidity and shock.

After assembly your device is plugged into a range of available contact forces, built to suit your application. Your circuit boards equipped with our sockets will enable your devices to be interchanged, or replaced in case of damage or upgrade, For more detailed information, contact us at Info@andonelect.com!

Phase 1:

Carrier Assemblies designed to your pin layout arrive at your facility pre-loaded and ready for assembly.

Phase 2:

Carrier Assembly is placed through your soldering process to ensure perpendicularity and coplanarity.

Phase 3:

After soldering, Carrier is removed from the assembly and your device is plugged in.

DIP CARRIER ASSEMBLY

DIP Carrier Assemblies carry two sips through your soldering process to provide a perfectly perpendicular and coplanar socket after soldering. After assembly, DIP carrier is either discarded or sent back to our factory for re-loading.

ULTRA LOW PROFILE SIP CARRIER ASSEMBLY

SIP Carrier Assemblies carry ultra low profile terminals through your soldering process to provide a space saving perfectly perpendicular, coplanar, and substrateless socket after soldering. After assembly, SIP carrier is either discarded or sent back to our factory for re-loading.

See Page 26 for Terminal Details and Contact Forces.

Image Sensor Socket Applications ULTRA LOW PROFILE PGA CARRIER ASSEMBLY

PGA Carrier Assemblies carry ultra low profile terminals through your soldering process to provide a space saving perfectly perpendicular, coplanar, and substrateless socket after soldering. After assembly, the PGA carrier is either discarded or sent back to our factory for re-loading.

ULTRA LOW PROFILE DIP CARRIER ASSEMBLY

DIP Carrier Assemblies carry ultra low profile terminals through your soldering process to provide a space saving perfectly perpendicular, coplanar, and substrateless socket after soldering. After assembly, the DIP carrier is either discarded or sent back to our factory for re-loading.

Standard Image Sensor Sockets

Standard Image Sensor Sockets take the place of your device during the assembly process, saving your devices from unexpected damage, and saving your companies bottom line from unexpected cost as a result. Can be designed to any pin layout or configuration. If your device's layout is not featured in this catalog, contact us at Info@andonelect.com.

See Page 26 for Terminal Details and Contact Forces.

1 mm (.0394 inch) Pitch BGA Sockets / Adapters Rollerball® Grid Array Socketing System

THE IDEAL SOLUTION TO FIX BGA ASSEMBLY PROBLEMS ON LARGE PCB'S

- ADAPTER WITH TERMINAL PINS FOR PLUGGING INTO ROLLERBALL® SOCKET. BGA SOLDERED DIRECTLY ONTO ADAPTER.
- SOCKET WITH ROLLERBALL® TERMINALS FOR SOLDERING DIRECTLY ONTO PCB.
- REWORK COST AND RISK OF DAMAGE REDUCED TO EXPENSIVE BGA AND MULTI LAYER PCB'S.

.0394 [1.00] X .0394 [1.00] PITCH
MANY FOOTPRINTS AVAILABLE

ROLLERBALL® GRID ARRAY
SOCKETING ASSEMBLY
U.S. Patent # 6,352,437
Canadian Patent # 2,388,520

TERMINAL STYLES

OTHER TERMINAL STYLES AVAILABLE (CONSULT FACTORY)

ADAPTER TERMINAL

-320 C'SUNK HEAD
-321 FLATHEAD

SOCKET TERMINAL

-319T SURFACE MOUNT

SOCKET TERMINAL

-RB339T SURFACE MOUNT ROLLERBALL®

TECHNICAL SPECIFICATIONS

MATERIAL:
INSULATOR: FR-4 LAMINATE U.L. RATED 94V-0
TERMINAL: BRASS PLATED GOLD
CONTACT: BeCu PLATED GOLD
SOLDERBALL: 96.5% TIN, 3.0% SILVER, 0.5% COPPER
ADAPTER: COPPER ALLOY PLATED GOLD

ORDERING INFORMATION

RoHS Compliant
Andon Proprietary Information
IS-13A 03/15/13

At Andon Electronics we provide interconnection components that help companies to cost effectively protect, assemble, test and replace their semiconductor devices.

- PGA SOCKETS & ADAPTERS
- BGA SOCKETS & ADAPTERS
- SMD SOCKETS & ADAPTERS
- DIP SOCKETS & ADAPTERS
- SIP SOCKETS & ADAPTERS
- FUSE SOCKETS
- TERMINALS AND TEST JACKS
- LCC SOCKETS
- PLCC SOCKETS
- IMAGE SENSOR SOCKETS
- GAS SENSOR SOCKETS
- OPTOELECTRONIC SOCKETS
- CARRIER SOCKETS
- BATTERY SOCKETS
- TEST SOCKETS
- POWER CONVERTER SOCKETS

We offer custom as well as our standard catalog items.

Our intention is to be your one stop for all of your interconnection requirements.

Please visit our website at www.andonelect.com if you have any questions please do not hesitate to contact us.
