

WEiPU[®] Connector

 WEiPU[®]

IP 67

M23
Power

For Servo motor

Features:

The M23 connector is our new series connector, threaded coupling. The shell material is zinc alloy with nickel plating, insert material is PA66.

The shell diameter is 26.5mm (the panel hole cutout diameter is 18mm),

The connectors are used for cable to cable or to panel-mount connections. Each side can be male or female contact, (Plug or socket versions).

There are four different type: plug, square flange receptacle, angled plug and angled square flange socket.

- 1) shell diameter (the panel hole cutout size): 26.5mm
- 2) number of contacts: 6/8 gold plated contacts
- 3) rated current and V: 8-20A, 150-300(AC. V)
- 4) IP rating: IP67
- 5) CE, ROHS approval
