

RJ45 connector with metal shell

- Be easily connected to 4-wire twisted wire without the use of professional tools;
- Error proofing connection technology – visible connection area and colorful knife-type terminals;
- EMC shielding and deflecting features (metal shell)
- Industrial compatibility design (metal housing is difficult to damage the small accessories)
- RJ45 plug connector is applicable to installation on site;
- Avoid installing mistakes by colorful coding and transparent nut;
- RJ45 plug connector, with compact structure, could be used under industrial environments and in offices, meanwhile connected with Profinet, CANopen and EtherCAT cable.
