

Pressure Sensors

▶ Company Profile

Tianjin Geneuo Technology Co., Ltd. specializes in the development, production and sales of industrial automation products, system integration and engineering service.

- Communication solution

- Industry EtherNET Switch

- Fieldbus modules: ProfiNET, EtherNET/IP, EtherCAT, MODBUS TCP/IP I/O modules

- Inductive sensors

- Different housing design are available:M5 to M80 and cubic

- Optimized connection technology for efficient automation

- M5 to M40 receptacle, pre-moulding cable, field wireable connectivity

- Passive junction box and splitters

- Industrial network connectors for ProfiNET, EtherNET/IP, EtherCAT, MODBUS TCP/IP,Profibus,DeviceNET,CC-link.

- LED lighting

- Machine station lighting

- Factory lighting

- Intelligent lighting solutions

Geneuo exceptionally large product portfolio does not only cover all relevant standard solutions but also the special requirements of individual industries. The products and the total solution have been widely used in automotive, iron & steel, machine tool, elevator, textile, packaging, rubber machine etc.

Operating principle

Pressure sensors operating principle is based on thick film piezoresistive bridge circuit.

Wheatstone measuring bridge circuit (close-loop bridge), made of thick film varistor, is printed on the back of film.

After connect to power supply, varistors on bridge arm will have little deformation to change the resistance value while the measured media pressure work on the surface of ceramic film directly. Then voltage of bridge will be changed and output a linear mV signal which is proportional to actual pressure and to excitation voltage.

The internal chip will receive and process this signal, then display the current media pressure on display board. And compare this signal with user-setting value automatically, then active a DO or AO output.

Thick film pressure resistance bridge circuit diagram

GSEE-TECH unique diaphragm manufacturing technology assures excellent long-term stability of pressure sensors, which has been used in thousands of industrial applications.

Application of pressure sensor

Pressure sensors, with high operational reliability, accuracy, sensitivity, and wide media temperature range, can be suitable for so many different applications.

Based on the piezoelectric ceramics detection technology, pressure sensors have impact strength and vibration resistance, could operate safely under harsh application environment.

Hard housing makes GSEE-TECH pressure sensors could be applied in various industries such as metallurgy, automotive manufacturing, hydraulic and lubrication, petrochemical, power and machine tools etc.

Classical applications

Measure and control - gas and liquid pressure in pipeline system;

Monitor oil pressure in hydraulic cylinders and oil pipe, ensure pipeline safety;

Monitor pressure value fluctuation of cutting oil;

Monitor media pressure inside of container

Industry applications

- Metallurgy - measure oil pressure of lubrication system in cold rolling, hot rolling and finishing rolling factories
- Automobile - monitor lubrication & hydraulic system in powertrain & pressing shop, welding jig hydraulic system, air pressure and water pump of coating process factory
- Metal processing - monitor hydraulic and pressure system in punching machine, CNC and aided manufacturing
- Cement - monitor main mill, apron feeder and gear lubrication and hydraulic system
- Another industries - monitor lubrication of gearbox

Application on monitoring lubricating oil in main pipe of main mill lubrication station in cement industry

Features description	51 series pressure transmitters meet the highest specifications for longevity, accuracy, temperature stability and EMC characteristics, making them suitable for an extremely wide range of demanding industrial applications.	The compact type 52 pressure transmitter for shipbuilding. The pressure cell incorporates a fully welded construction within the transducer housing. Highest requirements in various applications concerning burst can be met.	The compact type 57 pressure transmitter is based upon the well proven ceramic technology. These transmitters are suitable for applications across a broad spectrum of industries and shipbuilding.

60 series with piezoresistive measuring elements have compensated, calibrated and amplified sensor signals. Its welded construction provides a watertight seal. With its sophisticated building block system, individual designs to meet specific applications are possible.	The programmable pressure sensor type 50 series have a robust industry design. The parameters are easily adjustable with two function keys. The large 4 digit LED display assures a good accuracy of reading. The pressure measuring cell is fully welded.	The programmable pressure sensor type 58 series have a robust industry design. The parameters are easily adjustable with two function keys. The large 4 digit LED display assures a good accuracy of reading. The pressure measuring cell is fully welded.	The programmable pressure sensor type 69 has a robust industry design. Parameters can easily be programmed with three different configuration menus with easy to operate keys. The large 4 digit LED display assures a good accuracy of reading.

(4)Other types with different pressure connection please see dimension drawing and ask relative PM at the same time

57 Series Relative pressure transmitter for shipbuilding

GPT-57...

- Compact, rugged construction
- Welded without sealing parts
- The thick stainless steel pressure measuring element
- Excellent EMC capacity
- Suitable for industrial applications, the most important certifications for the shipbuilding industry.
- Certified :

- Connector : page 42
- Accessories : page 42
- dimensional drawing : page 43
- Wiring diagram : page 44

Pressure transmitter type (1)		GPT-578-070B-...	GPT-57B-070B-...
Medium		Liquids and gases	
Pressure range		0 ... 60 bar, Relative (2)

3 wire (0-10 V , voltage output)

60 Series Flush Diaphragm pressure transmitter

GPT-60...

- Effective overload protection due to chemically etched chip diaphragm and specially designed glass gland
- Piezo resistive silicon pressure measurement element, flush diaphragm structure
- Fast and affordable customer specific solutions due to building block system, even for small quantities
- Compact construction with SMD technology enhances operational reliability in the presence of shock and vibration
- Welded construction provides 100% sealing against media

60 Series Flush Diaphragm pressure transmitter

GPT-60...

- Effective overload protection due to chemically etched chip diaphragm and specially designed glass gland
- Piezo resistive silicon pressure measurement element, flush diaphragm structure
- Fast and affordable customer specific solutions due to building block system, even for small quantities
- Compact construction with SMD technology enhances operational reliability in the presence of shock and vibration
- Welded construction provides 100% sealing against media

58 Series Pressure Switch With Digital Display

GPD-58...

- Compact, rugged construction, High over pressure
- ceramic Al₂O₃ as the sensor
- Clearly readable display, Sensitive operation keys
- Diagnostic function
- suitable for an extremely wide range of demanding industrial applications, Especially the sewage treatment plant
- Certified :

(4)Other types with different pressure connection please see dimension drawing and ask relative PM at the same time

69 Series Pressure Switch With Digital Display

GPD-69...

- Rugged construction, High over pressure
- Ceramic Al₂O₃ as the sensor
- Clearly readable display, Sensitive operation keys
- Diagnostic function
- suitable for an extremely wide range of demanding industrial applications
- Certified :   
- Connector : page 81
- Accessories : page 81
- dimensional drawing : page 82
- Wiring diagram : page 83
- -----

Pressure Switch type ⁽¹⁾		GPD-692-160B-...
Medium		Liquids and gases
Pressure range		0 ... 160 bar, Relative ⁽²⁾
Max. allowable pressure		640 bar / 960 bar
Power supply		17 ... 33 VDC
Rated operation current (Digital output)		200 mA
Temperature		-20 ... +80 °C
Protection class		IP67
Materials in contact with the medium	Pressure connection	Stainless steel 1.4404 / AISI 316L
	Sensor	ceramic Al ₂ O ₃ (96%)
	Sealing material	FPM
Current consumption		< 200 mA , typ. 50 mA
Load resistance	4...20 mA Current output	< 0.5 kΩ
	0...10 V Voltage output	>10 kΩ
Response time		typ. 5 ms
Electrical protection		Short circuit proof and protected against polarity reversal. Each connection is protected against crossover up to max. supply voltage.
TC	TC zero point	≤ ± 0.5 % fs /10 K
	TC sensitivity	≤ ± 0.15 % fs /10 K
Total of linearity hysteresis and repeatability		≤ ± 0.5 % fs
Tolerance zero point		≤ ± 0.5 % fs
Tolerance		≤ ± 0.5 % fs
Shock		50 g(11ms half sine wave), acc. IEC 60068-2-27
Vibration		20 g (10 ... 2000 Hz), acc. IEC 60068-2-6
Electrical connection ⁽³⁾		Connector M12x1, Metal thread
Pressure connection ⁽⁴⁾		G1/4" Inside thread, with O-Ring sealing
Output type —Type, ID No.	4...20 mA Current output + 1 DO(PNP/NPN)	GPD-692-160B-3 , A516C105
	0...10 V Voltage output + 1 DO(PNP/NPN)	GPD-692-160B-4 , A516C106
	2 DO(PNP/NPN)	GPD-692-160B-2 , A516C104
