

- 1** Cable specification and environment application can be defined, Cold, heat, weather, UV, chemical, oil, salt resistance... Application for automation, automobile, agriculture, railway, industrial computer, mining, lighting, marine....
- 2** Low pressure injection overmolding:
 - #1. Watertight encapsulation.
 - #2. Exceptional resistance to extreme thermal cycling.
 - #3. High temperatures and chemical exposure.
 - #4. PCB and component protection.
- 3** Panel mounting connector with wire harness assembly can be define.
- 4** More than 300+ HOLIN's Waterproof Connectors can be chosen.
- 5** Outsourcing service for component and PCB assembly
- 6** Custom molding for Strain relief, molded junction, bushing, Electronic component protection....
- 7** The overmold of PCB can be enclosure injection and box assembly. Type of resin can be defined.
- 8** Molded connectors or components can be defined. Size of connectors, Size of pins, number of pins, resin type, shape can be customized....
