

New and Improved: SP/SY Cable Socket-C

We're thrilled to unveil a significant upgrade to our signature SP and SY series cable connector sockets. In our continuous pursuit of excellence and innovation, we've **eliminated the gap between the connector's main socket body and the back shell**.

This improvement:

- Strengthen the seal
- Boost the overall reliability and durability of these connectors, making them perfectly suited for a diverse range of applications.
- This alteration does not affect the product's function or material quality and is compatible with old models.

Before & After: See the Difference

SP/SY CABLE SOCKET UPDATED

To distinguish these enhanced versions, **the part number will be added one C on the end**, indicating they are the latest, most advanced models.

Updated Part Numbers:

SP Series: SP1111**C**, SP1311**C**, SP1711**C**, SP2111**C**, SP2511**C**, SP2911**C**

SY Series: SY1111**C**, SY1311**C**, SY1711**C**, SY2111**C**, SY2511**C**, SY2911**C**

This enhancement is part of our ongoing commitment to provide high-quality, reliable connectivity solutions that meet the evolving needs of our customers.
