

KEL for Industrial Equipment

Our products contribute to infrastructure equipment that supports modern people's lives.

Applications:

<p>Production printer</p> 	<p>Plant factory</p> 		
<p>DT</p> 	<p>DT</p> 	<p>FW</p> 	<p>FWS</p> 

Productivity improvements through high-performance semiconductors and automation are essential elements of industrial and technological innovation.

We will contribute to the promotion of sustainable industrialization through manufacturing.

Drone

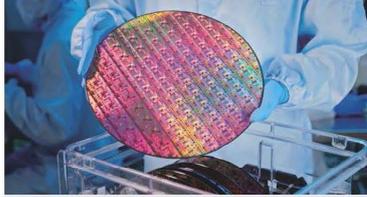

<p>DT</p>  <p>• Signal processing board to RF board</p>	<p>XSLS</p>  <p>• Main board to image processing board</p>
<p>USLS</p>  <p>• Main board to sensor board</p>	<p>FWS</p>  <p>• Main body to motor</p>

ATM

<p>DY</p>  <p>• Main body to bill unit</p>	<p>FA</p>  <p>• Main body to bill unit</p>
<p>FAS</p>  <p>• Main body to bill unit</p>	<p>8929E</p>  <p>• Main body to bill unit</p>

Semiconductor manufacturing equipment

<p>DT</p>  <p>• Internal connection of the main body</p>	<p>DY</p>  <p>• Internal connection of the main body</p>
<p>DU</p>  <p>• Main board to tester board</p>
